pocketuae

Its not just data- its people.

PocketUAE™ is a powerful Pocket PC application that displays an interactive access to useful information with regards to UAE. Several features has been facilitated in this major release of PocketUAE™, the prominent ones being GPRS, WIFI support and real-time most accurate data that are synchronized with the pocket UAE website. (www.PocketUAE.com)

Introduction:

In this application main categories of data about UAE are;

- Food & Drink
- Medical & Health
- Sports & Leisure
- Shopping
- Automobile & Transport
- Education
- Accommodation
- Entertainment
- Business & Finance
- Travel & Tourism
- History & Culture
- Essential & Emergency

PocketUAE™ has been designed to be a portable yellow page in your pocket.

The program allows the user to break down and display full details such as Name, Phone number, Fax, Email, Website, Address, Special promotion i.e.: *Free Drink, Free Entrance, Buffet, Fast Food, Happy Hour, ladies Night, Gents Night, Shishe, News* and many other details of a record.

The user has two options to retrieve information from the database; either to click the search button to list the results as per the criteria which has been selected from the main and subcategory of data or, simply uses the built-in keyboard and types the keyword and search for a specific name of an outlet or business.

This device will allow the user to not only have an access to all the above info but also to gather and search for more information such as daily promotions, special offers, latest events and furthermore.
